Understanding Audio Needs and Challenges
Exploring **abstract** sounds
Documenting auditory **challenges**
Sound **context** exploration
Envisioning Audio Futures
Magic Radio Prompts
Envisioning **qualities** of radio - angry, caring, accessible
Supported **discussions** around sticky notes and flip chart
Designing Audio Experiences
Physical **radio mockup** with sticky notes
Imagining **aphasia-friendly** audio **content**
Discussions around **contexts** in which audio is listened to
W1
W2
W3
W4
W5
W6
Exploring **existing** and **mockup** apps
Understanding listening **contexts** and technologies
Understanding listening **habits and related challenges**
Understanding Audio Contexts and Aspirations
AccioBook, a technology probe which allows for controlling **pace of audio** content
Simplico, a technology probe which allows for **reflective**, simplification and re-simplfication
Incluscribe, a technology probe which allows for **live** multimodal simplification
Critiquing Audio Intervention Probes
Reflections on finalised technology probes
Prioritisation of common goals to discuss with **broadcasters**
Future **community-led design** mapping
Reflecting on Finalised Interventions
